

# Daily Summary — Feb 14, 2026

## Session Objectives

- Finalize Hub Integration (Business & Career)
- Implement Deep Link Mastery & Forensic Ledger
- Integrate Brainstormed "Clinical Finance" & "Surgical Scripting" tracks
- Execute `/organize-files` & `/panel-review` workflows

## Accomplishments

- **Hub Unification:** Merged Business and Career hubs into a single `command-center` engine with high-contrast theme switching.
- **Deep Link Mastery:** Implemented `#mode:section` routing with auto-scroll and clinical highlight ping animations.
- **Interactive Diagnostics:** Seeded the Career hub with a Siemens PPCL/V8 Console quiz system + Sidebar badges.
- **Technical Strategy:** Promoted the DDIA mapping to the Playbook core ( `clinical-architecture.md` ).
- **Surgical Scripting:** Established the "Learn to Code" track and playbook for CDA technical development.
- **Clinical Finance:** Added a dedicated card for burn/income visibility to the Business Hub.
- **Forensic Audit:** Created the `forensic-ledger.md` to track system anomalies and recovery events.
- **Hygiene:** Purged legacy root files and triaged forensic artifacts into `.agent/`.
- **Expert Review:** Completed a Full System Audit with an **A- (Surgical)** grade from the Sprint Command panel.

## Action Items Added

- **a21:** Link Clinical OS protocol to Black Nexus onboarding track (Darius)
- **a22:** Final iPhone test for Deep Link highlight visibility (Noa)
- **a23:** Extract inline Hub CSS to `hub-core.css` (Noa)

## Strategy Sync

- Revenue goal (\$5K consulting) validated as in-sync between Antigravity docs and Dashboard.
- WNQ launch sequence (Feb 27) correctly mapped to all task sections.

## Git Checkpoints

- `command-center` : Pushed Hub UI, Playbook track, and organization updates.
- `Business Ideas` : Pushed Panel Review reports.
- `antigravity` : Pushed registry and decision log updates.
