

ClickUp Setup — JB Dashboard Project

Space: Black Nexus
List: Development Projects

Task: Build Black Nexus Command Center Dashboard

Assignee: JB Scott
Watcher: Justice McKinney
Priority: High
Due Date: Feb 24, 2026 (2-week sprint)

Description

Build a single-page dashboard (HTML/CSS/JS) that tracks all Black Nexus business milestones. This is your first contribution to the org. Full creative freedom on design — just make it functional and professional.

 **Attachments:** `jb_dashboard_project_brief_2026-02-10.pdf`
 **GitHub Repo:** `github.com/blacknexuscda/command-center`

Subtasks

#	Subtask	Est. Time	Notes
1	Set up local project folder + open in editor	30 min	Install VS Code if needed
2	Build HTML structure (sections, headings, task lists)	1–2 hrs	Focus on semantic HTML
3	Style with CSS (dark theme, layout, mobile responsive)	2–3 hrs	Flexbox or Grid
4	Add JavaScript (task state cycling, localStorage)	2–3 hrs	DOM manipulation practice
5	Add progress indicator per section	1 hr	Stretch goal
6	Push to GitHub <code>blacknexuscda/command-center</code>	30 min	First git push!
7	Create Pull Request for review	15 min	Justice will review

Total estimated time: 8–10 hours (spread across 1–2 weeks)

Acceptance Criteria (Definition of Done)

- ☐ All 5 task sections render correctly
- ☐ Task state cycling works (click to change status)
- ☐ States persist on page refresh (localStorage)
- ☐ Looks professional on desktop and mobile
- ☐ Code lives in `blacknexuscda/command-center`
- ☐ PR submitted and approved
